

Casa al Mar Costa Blanca

concept

Elevated on a cliffside on the Mediterranean sea the 'Casa al Mar' is defined by its spacious open plan living with panoramic views over the sea and surrounding hills and mountains of the site. The rooms are separated by the central timber clad island, which incorporates all service functions of the house like the staircase, the bathrooms and the kitchen. An elevated walkway connects the street to the entrance and balcony area while car parking is set in the shade below the house.
